IIE Transactions (1995) **27**, 823–834

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 1995

Ahmadi, R.H. and P. Kouvelis; *Design of a testing fixture for printed circuit boards*; February; p. 81.

Ahn, Byung-Hyuk, O.F. Offodile and A. Mehrez; *A decision analysis view of the effect of robot repeatability on profit*; February; p. 60.

Bengu, G.; *An optimal storage assignment for automated rotating carousals*; February; p. 105

Bidanda, B. and R.E. Billo; *Representing group technology classification and coding techniques with object oriented modeling principles*; August; p. 542.

Billo, R.E. and B. Bidanda; *Representing group technology classification and coding techniques with object oriented modeling principles*; August; p. 542.

Boucher, T.O., M.A. Jafari and G.A. Meredith; *A transformation from a Boolean equation control specification to a Petri net*; February; p. 9.

Bukkapatnam, S.T., S.R.T. Kumara and A. Lakhtakia; *Dependence of computed trajectory on step-size in a nonlinear dynamic system: an investigation into cutting tool dynamics;* August; p. 519.

Buzacott, J.A., X.-G. Liu and J.G. Shanthikumar; *Multistage flow line analysis with the stopped arrival queue model*; August; p. 444.

Cala, M., K. Srihari and C.R. Emerson; *Process and production planning for circuit board assembly*; February; p. 90.

Chang, Ding-Tsair, Ue-Pyng Wen and J.T. Lin: *The impact of acceleration/deceleration on travel-time modes for automated storage/retrieval systems*; February; p. 108.

Cheraghi, S.H., E.A. Lehtihet and P.J Egbelu: *Vision-assisted lead-to-pad alignment technique for placement of surface mount components*; August; p. 473.

Chiang, Wen-Chyuan, P. Kouvelis and Gang Yu; *Optimal algorithms for row layout problems in automatic manufacturing systems*; February; p. 99.

Daskin, M., V.N. Hsu, P.C. Jones and T.J. Lowe; *Tool selection for optimal part production: a Lagrangian relaxation approach*; August; p. 417.

Duenyas I. and M.F. Keblis; *Release policies for assembly systems*; August; p. 507.

Egbelu. P.J., S.H. Cheraghi and E.A. Lehtihet; *Vision-assisted lead-to-pad alignment technique for placement of surface mount components*; August; p. 473.

Emerson, C.R., K. Srihari and M. Cala; *Process and production planning for circuit board assembly*; February; p. 90.

Gascon, A and P. Lefrançois; *Solving a one-dimensional cutting-stock problem in a small manufacturing firm: a case study*; August; p. 43.

Hendricks, K.B. and L.W. Robinson; *Using state-dependent processing rates to emulate SPT queue discipline in a FCFS queueing network*; August; p. 530.

Hsu, V.N., M. Daskin, P.C. Jones and T.J. Lowe; *Tool selection for optimal part production: a Lagrangian relaxation approach*; August; p. 417.

Huang, S.H., Hong-Chao Zhang and M.L. Smith; *A progressive approach for the integration of process planning and scheduling*; August; p. 456.

Irani, S.A., M. Shargal and S. Shekhar; *Evaluation of search algorithms and clustering efficiency measures for machine-part matrix clustering*; February; p. 43.

Jackson J. and L.C. Schmidt; *Evaluating assembly sequences for automatic assembly systems*; February; p. 23.

Jafari, M.A., G.A. Meredith and T.O. Boucher; *A transformation from a Boolean equation control specification to a Petri net*; February; p. 9.

Jones, P.C., V.N. Hsu, M. Daskin, and T.J. Lowe; *Tool selection for optimal part production: a Lagrangian relaxation approach*; August; p. 417.

Keblis, M.F. and I. Duenyas; *Release policies for assembly systems*; August; p. 507.

Kouikoglou, V.S. and Y.A. Phillis; *An efficient discrete-event model for production networks of general geometry*; February; p. 32

Kouvelis, P. and Hau L. Lee; *An improved algorithm for optimizing a closed queueing network model of a flexible manufacturing system*; February; p. 1.

Kouvelis, P. and R.H. Ahmadi; *Design of a testing fixture for printed circuit boards*; February; p. 81.

Kouvelis, P., Wen-Chyuan Chiang and Gang Yu; *Optimal algorithms for row layout problems in automatic manufacturing systems*; February; p. 99.

Krishnaswamy, K.N., K.S. Rao and B.S. Raghavendra; *Structured systems methodology for evaluation of random interruptions in continuous process type manufacturing systems*; August; p. 435.

Kumara, S.R.T., S.T. Bukkapatnam and A. Lakhtakia; *Dependence of computed trajectory on step-size in a nonlinear dynamic system: an investigation into cutting tool dynamics*; August; p. 519.

Kusiak, A. and N. Larson; *Work-in-process space allocation: a model and an industrial application*; August; p. 497.

Lakhtakia, A., S.T. Bukkapatnam and S.R.T. Kumara; *Dependence of computed trajectory on step-size in a nonlinear dynamic system: an investigation into cutting tool dynamics*; August; p. 519.

Larson, N. and A. Kusiak; *Work-in-process space allocation: a model and an industrial application*; August; p. 497.

Lee, Hau L. and P. Kouvelis; *An improved algorithm for optimizing a closed queueing network model of a flexible manufacturing system*; February; p. 1.

Lefrançois, P. and A. Gascon; *Solving a one-dimensional cutting-stock problem in a small manufacturing firm: a case study*; August; p. 483.

Lehtihet, E.A., S.H. Cheraghi and P.J Egbelu; *Vision-assisted lead-to-pad alignment technique for placement of surface mount components*; August; p. 473.

Lin, J.T., Oe-Pyng Wen and Ding-Tsair Chang; *The impact of acceleration/deceleration on travel-time models for automated storage/retrieval systems*; February; p. 108.

Linn, R.J. and S. Mishra; *Optimization of machining process plan for planar surfaces*; August; p. 427.

Liu, X.-G., J.G. Shanthikumar and J.A. Buzacott; *Multistage flow line analysis with the stopped arrival queue model*; August; p. 444.

Lowe, T.J., V.N. Hsu, M. Daskin and P.C. Jones; *Tool selection for optimal part production: a Lagrangian relaxation approach*; August; p. 417.

Mehrez, A., O.F. Offodile and Byung-Hyuk Ahn; *A decision analysis view of the effect of robot repeatability on profit*; February; p. 60.

Meredith, G.A., M.A. Jafari and T.O. Boucher; *A transformation from a Boolean equation control specification to a Petri net*; February; p. 9.

Mishra, S. and R.J. Linn; *Optimization of machining process plan for*

0740-817X © 1995 "IIE"

planar surfaces; August; p. 427.

O'Grady, P., Jhong Sik Oh and R.E. Young; *A constraint network approach to design for assembly*; February; p. 72.
Offodile, O.F., A. Mehrez and Byung-Hyuk Ahn; *A decision analysis view of the effect of robot repeatability on profit*; February; p. 60.
Oh, Jhong Sik, P. O'Grady and R.E. Young; *A constraint network approach to design for assembly*; February; p. 72.

Phillis, Y.A. and V.S. Kouikoglou; *An efficient discrete-event model for production networks of general geometry*; February; p. 32.

Raghavendra, B.G., K S. Rao and K.N Krishnaswamy; *Structured systems methodology for evaluation of random interruptions in continuous process type manufacturing systems*; August; p. 435.
Rao, K.S., K.N. Krishnaswamy and B.G. Raghavendra; *Structured systems methodology for evaluation of random interruptions in continuous process type manufacturing systems*; August; p. 435.
Robinson, L.W. and K.B. Hendricks; *Using state-dependent processing rates to emulate SPT queue discipline in a FCFS queueing network*; August; p. 530.

Schmidt, L.C. and J. Jackson; *Evaluating assembly sequences for automatic assembly systems*; February; p. 23.
Shanthikumar, J.G., X-G. Liu and J.A. Buzacott; *Multistage flow line analysis with the stopped arrival queue model*; August; p. 444.
Shargal, M., S. Shekhar and S.A. Irani; *Evaluation of search algorithms and clustering efficiency measures for machine-part matrix clustering*; February; p. 43.
Shekhar, S., M. Shargal and S.A. Irani; *Evaluation of search algorithms and clustering efficiency measures for machine-part matrix clustering*; February; p. 43.
Smith, A.E. and D.M. Tate; *Unequal-area facility layout by genetic search;* August; p. 465.
Smith, M.L., S.H. Huang and Hong-Chao Zhang; *A progressive approach for the integration of process planning and scheduling*; August: p. 456.
Srihari, K., M. Cala and C.R. Emerson; *Process and production planning for circuit board assembly*; February; p. 90.

Tate, D.M. and A.E. Smith; *Unequal-area facility layout by genetic search*; August; p. 465.

Wen, Ue-Pyng, Ding-Tsair Chang, and J.T. Lin; *The impact of acceleration/deceleration on travel-time models for automated storage/retrieval systems*; February; p. 108.

Young, R.E., P. O'Grady and Jhong Sik Oh; *A constraint network approach to design for assembly*; February; p. 72.

Yu, Gang, P. Kouvelis and Wen-Chyuan Chiang; *Optimal algorithms for row layout problems in automatic manufacturing systems*; February; p. 9.

Zhang, Hong-Chao, S.H. Huang and M.L. Smith; *A progressive approach for the integration of process planning and scheduling*; August; p. 456.

SCHEDULING AND LOGISTICS

AUTHOR INDEX FOR 1995

Altiok, T. and R. Ranjan; *Multi-stage, pull-type production/inventory systems*; April; p. 190.

Anily, S.; *Single-machine lot-sizing with uniform yields and rigid demands: robustness of the optimal solution*; October; p. 625.

Arcelus, F.J. and G. Srinivasan; *Discount strategies for one-time-only sales*; October; p. 618.

Bai, S.X. and S.B. Gershwin; *Scheduling manufacturing systems with work-in-process inventory control: single-part-type systems*; October; p. 599.

Barnes, J.W. and J.B. Chambers; *Solving the job shop scheduling problem with tabu search*; April; p. 257.

Brimberg, J. and R.F. Love; *Generalized hull properties for location problems*; April; p. 226.

Chambers, J.W. and J.B. Barnes; *Solving the job shop scheduling problem with tabu search*; April; p. 257.

Chen, Hsin-Der and Chung-Yee Lee; *Error bound for the dynamic lot size model allowing speculative motive*; October; p. 683.

Cheng, T.C.E. and J.E. Diamond; *Scheduling to job classes on parallel machines*; October; p. 689.

Cheung, Ki Ling and W.H. Hausman; *Multiple failures in a multi-item spares inventory model*; April; p. 171.

Chung, S.H., H.J. Kim and D.W. Tcha; *Optimal design of the two-level distributed network with dual homing local connections*; October; p. 555.

de Matta, R. and M. Guignard; *The performance of rolling production schedules in a process industry*; October; p. 564.

de Werra, D., F. Glover and E.A. Silver; *A chromatic scheduling model with costs*; April; p. 181.

Diamond, J.E. and T.C.E. Cheng; *Scheduling two job classes on parallel machines*; October; p 689.

Dobson, G. and I. Khosla; *Simultaneous resource scheduling with batching to minimize weighted flow times*; October; p. 587.

Emmons, H. and S. Gilbert; *Managing a deteriorating process in a batch production environment*; April; p. 233.

Foote, B.L.; *On the implementation of a control-based forecasting system for aircraft spare parts procurement*; April; p. 210.

Gershwin, S.B. and S.X. Bai; *Scheduling manufacturing systems with work-in-process inventory control: single-part-type systems*; October; p. 599.

Gilbert, S. and H. Emmons; *Managing a deteriorating process in a batch production environment*; April; p. 233.

Glover, F., D. de Werra and E.A. Silver; *A chromatic scheduling model with costs*; April; p. 181.

Guignard, M. and R. de Matta; *The performance of rolling production schedules in a process industry*; October; p. 564.

Gutierrez, G.J., W.H. Hausman and Hau L. Lee; *Dynamic control of imperfect component production for assembly operations*; October; p. 669.

Hahm, J. and C.A. Yano; *The economic lot delivery scheduling problem: models for nested schedules*; April; p. 126.

Hahm, J. and C.A. Yano; *The economic lot delivery scheduling problem: the common cycle case*; April; p. 113.

Hall, R.W. and M. Racer; *Transportation with common carrier and private fleets: system assignment and shipment frequency optimization*; April; p. 217.

Hariga, M.A. and P.L. Jackson; *Time variant lot sizing models for the warehouse scheduling problem*; April; p. 162.

Hausman, W.H. and Ki Ling Cheung; *Multiple failures in a multi-item spares inventory model*; April; p. 171.

Hausman, W.H., G.J. Gutierrez and Hau L. Lee; *Dynamic control of imperfect component production for assembly operations*; October; p. 669.

Jackson, P.L. and M.A. Hariga; *Time variant lot sizing models for the warehouse scheduling problem*; April; p. 162.

Khosla, I. and G. Dobson: *Simultaneous resource scheduling with batching to minimize weighted flow times*; October; p, 587.

Kim, H.J., S.H. Chung and D.W. Tcha; *Optimal design of the two-level distributed network with dual homing local connections*; October p. 555.

Lawrence, S.R.; *Estimating flow times and setting due-dates in Complex Production Systems*; October; p. 657.

Lee, Chung-Yee and Chen-Sin Lin; *Single-machine stochastic scheduling with dual criteria*; April; p. 244.

Lee, Chung-Yee and G.L. Vairaktarakis; *The single-machine scheduling problem to minimize total tardiness subject to minimum number of tardy jobs*; April; p. 250.

Lee, Chung-Yee and Hsin-Der Chen; *Error bound for the dynamic lot size model allowing speculative motive*; October; p. 683.

Lee, Hau L., G.J. Gutierrez and W.H. Hausman; *Dynamic control of imperfect component production for assembly operations*; October; p. 699.

Lin, Chen-Sin and Chung-Yee Lee; *Single-machine stochastic scheduling with dual criteria*; April; p. 244.

Love, R.F. and J. Brimberg; *Generalized hull properties for location problems*; April; p. 226.

Matta, K.F. and D. Sinha; *Policy and cost approximations of two-echelon distribution systems with a procurement cost at the higher echelon*; October; p. 638.

Muckstadt, J.A. and S.R. Tayur; *A comparison of alternative kanban control mechanisms. I. Background and structural results*; April; p. 140.

Muckstadt, J.A. and S.R. Tayur; *A comparison of alternative kanban, control mechanisms. II. Experimental results*; April; p. 151.

Ozdamar, L. and G. Ulusoy; *A survey on the resource-constrained project scheduling problem*; October; p. 574.

Racer, M. and R.W. Hall; *Transportation with common carrier and private fleets: system assignment and shipment frequency optimization*; April; p. 217.

Rachamadugu, R.; *Scheduling jobs with proportionate early/tardy penalties*; October; p. 679.

Raman, N; *Input control in job shops*; April; p. 201.

Ramudhin, A. and H.D. Ratliff; *Generating daily production schedules in process industries*; October; p. 646.

Ranjan, R. and T. Altiok; *Multi-stage, pull-type production inventory systems*; April; p. 190.

Ratliff, H.D. and A. Ramudhin; *Generating daily production schedules in process industries*; October: p. 646.

Shore, H.; *Setting safety lead-times for purchased components in assembly systems: a general solution procedure*; October; p. 634.

Silver, E.A., F. Glover and D. de Werra; *A chromatic scheduling model with costs*; April; p. 181.

Sinha, D. and K.F. Matta; *Policy and cost approximations of two-*

echelon distribution systems with a procurement cost at the higher echelon; October; p. 638.
Srinivasan, G. and F.J. Arcelus; *Discount strategies for one-time-only sales*; October; p. 618.

Tayur, S.R. and J.A. Muckstadt; *A comparison of alternative kanban control mechanisms. I. Background and structural results*; April; p. 140.
Tayur, S.R. and J.A. Muckstadt; *A comparison of alternative kanban control mechanisms. II. Experimental results*; April; p. 151.
Tcha, D.W., H.J. Kim, and S.H. Chung; *Optimal design of the two-level distributed network with dual homing local connections*; October; p. 555.
Ulusoy, G. and L. Ozdamar; *A survey on the resource-constrained project scheduling problem*; October; p. 574.

Vairaktarakis, G.L. and Chung-Yee Lee; *The single-machine scheduling problem to minimize total tardiness subject to minimum number of tardy jobs*; April; p. 250.

Yano, C.A. and J. Hahm; *The economic lot delivery scheduling problem: models for nested schedules*; April; p. 126.
Yano, C.A. and J. Hahm; *The economic lot delivery scheduling problem: the common cycle case*; April; p. 113.
